

Press and radio release

Bio information: **David Borden/Mother Mallard**

Cuneiform Records is proud to announce the release of **The Continuing Story Of Counterpoint, Parts 9-12** by **David Borden and Mother Mallard** (Cuneiform Records Rune 16 CD).

David Borden, one of the foremost exponents of live electronic and minimalist music, has been active on the new music and contemporary classical scenes for two decades. He first came to attention as the driving force behind Mother Mallard, the world's first all synthesizer ensemble. Mother Mallard released two albums between 1973-76; Mother Mallard's Portable Masterpiece Company and Like A Duck To Water, both excellent and sought-after artifacts from the early days of synthesized music.

After the dissolution of Mother Mallard in the late 70's, Borden honed and refined his compositional skills, finally releasing his first solo effort Music For Amplified Keyboard Instruments in 1981. Next came the reformation of Mother Mallard. Anatidae (Cuneiform Rune 4), released in 1986, won him a whole new legion of fans and gathered considerable critical praise and airplay. The record, in one critics' words, was lauded for "successfully extending the boundries of minimalism." In early 1988 Migration (Cuneiform Rune 10) was released. In this work, jazz improvisation entered the minimalists repertoire. Migration received extensive critical acclaim, as well as considerable airplay. 20 years after his first appearance on the scene, Borden remains on the cutting edge of the new technology.

The Continuing Story Of Counterpoint is a remarkable 12 part musical cycle that Borden composed between 1976-87. Lasting 3 hours, Cuneiform is releasing this seminal work on 3 CDs, each containing 4 parts. **The Continuing Story Of Counterpoint, Parts 9-12** is the 1st of the 3 releases. The music is a pleasing and highly listenable mixture of classical forms, dense textures, strict counterpoint, and high energy electronics. This is an extremely important release, not only in David Borden's career, but in the genre of contemporary music. A landmark work among modern composition, **The Continuing Story Of Counterpoint** promises to become in the field of electronic & minimal music as well.

We are mailing promotional copies of **TCSOC, Parts 9-12** to radio stations as well as to print media and journalists known for their interest and support of new, independent music. Please be sure to send any playlists or press clippings to us.
